

# Interim Imaging Solutions

## Diagnostic imaging modalities include:

- Magnetic Resonance Imaging (MRI)
- Computed Tomography (CT)
- PET/CT
- Nuclear Medicine
- Cardiac/Angio

## DMS interim imaging solutions bridge gaps in your facility's imaging services.

When you have interruptions in patient care, DMS can help bridge the gap. Whether you are experiencing patient backlog, renovation, system upgrades, or disaster recovery, DMS can provide a complete turnkey solution through our interim fleet of diagnostic imaging systems.

Whatever your clinical and technical requirements, with DMS you'll have access to one of the youngest and largest fleets in the industry, with state-of-the-art technology from multiple manufacturers.

### Tailored Solutions

DMS' broad range and vast number of diagnostic imaging equipment and services can be customized to create a flexible solution, from as short as one week to any term necessary to meet your needs. In addition, DMS offers competitively priced systems with flexible contract terms.

DMS also offers healthcare facilities tailored Emergency Management Planning services to help you limit the impact of a disaster before it occurs. This plan will allow you to augment your facility's ability to respond to challenges faced in an emergency, and have solutions in place if disaster strikes.

### Service & Support

With DMS you will benefit from our experience and depth. DMS will manage every aspect of the project, from site planning, delivery and set-up, to follow-up maintenance and system removal – our goal is to make your rental seamless and hassle-free.

Our applications specialists are on-hand to provide you with assistance on protocols, image quality, and will help train your staff. With access to our 24-hour Service Call Center, you'll never go without technical, applications, or service assistance.

**Mobile, Interim & Fixed-Site Imaging Solutions**

## Proven

DMS has provided diagnostic imaging solutions to healthcare facilities nationwide for over thirty-five years. Our quality and experience have led to exclusive endorsement by several of the largest group purchasing organizations. The financial stability of our publicly-traded parent company allows us to invest in the latest technology and ongoing staff training and development.

Partnering with DMS will keep you up and running. We can bridge any gap that may exist in your facility's imaging services, enabling you to provide consistent quality care and industry leading services to your patients.

***DMS acts as a transparent extension of your facility's patient care with mobile imaging solutions that meet your clinical requirements and business objectives.***

"DMS was an accommodating partner from day one. The friendliness of the contract, their availability and variety of equipment options and their pricing were all reasons we chose them.

I would have no hesitation recommending DMS to anyone. The company is extremely reputable, their level of equipment and support is extremely good, and most importantly, they've really lived up to their promises."
